

WEB3's The Voice

Project Promotion Program — White Paper

Overview

WEB3's The Voice Karaoke Space now offers the Project Promotion Program. The program is designed to help promote Web3 projects and onboard more community members to your project, gaining visibility and engagement from a growing audience. WEB3's The Voice Karaoke Space is a constantly growing Space. It was created for everyone across Web3 to remove negative energy by singing it away, overcome stage fright, and build confidence. From very talented singers to newcomers, everyone loves music — and everyone secretly loves to sing. Come have fun, participate, and once you sing, you'll be coming back for more!

Program Details

- The project scheduled for that week's Space will receive Space name promotion.
- Collaborative artwork with WEB3's The Voice & the featured project is created and promoted within the Space and through promotional posts.
- A project representative will be a guest co-host and honorary judge.
- The project supplies artwork (logos, NFTs, project styles, themes).
- The project supplies shill scripts and white papers.
- In-call discussions with project members and founders cover all details and artwork renderings.
- The project supplies prizes for 5 winners: 1 grand prize and 4 runner-up prizes (NFTs, tokens, or both).

Timing & Promotion

The earlier we can get on calls and coordinate during the week, the more promotional content can be created and pushed on the timeline to build up the Space and promote your project.

Next Steps

We look forward to all collaborations and helping onboard more members to your community, bringing more communities together. Fill out the application form and we will be in touch within 24 hours.
